DETAILED ACTION

1. The notice of allowability mailed May 18, 2005, has been withdrawn. A notice of withdrawal from issue was mailed June 15, 2005. This action is further in response to an amendment filed December 10, 2004. This application is a continuation of serial number 09/988,080 filed November 16, 2001, now US Patent 6,662,822 issued December 16, 2003. Two Information disclosure statements (IDS) filed October 17, 2003, and March 6, 2004 have been considered. Claims 1 and 7 have been amended. Claim 10 has been cancelled. Claims 1-9, 11 and 12 are pending.

Claim Rejections - 35 USC § 101

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

3. A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

5. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

6. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1, and 3-5 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4, respectively, of U.S. Patent No. 6,662,822. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim is a broader version of the patented claims 1-4 of Patent 6,662,822.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-9 and 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Manzolli. Manzolli shows a “one-way nut fastener 24 comprising a nut body having at least one lobe 52 that extends from a side wall and a flat portion 56. A threaded through-hole 18 is shown. The “nut body” is turned by applying a rotational force. A curved portion is included on the lobes of the nut body. A plurality of lobes are shown in the Figures 5. The nut body acts as a cap for member 14.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In particular note the patents to Mueller, Robinson and Ford.
